

Gardens In Plain View

Strolls to see front gardens any day of the week!

STROLL STATS: Time: One hour Miles: 3.39 Steps: 7,159

The Delaware District

This popular section of Garden Walk Buffalo offers a splendid array of architecture and green spaces. Highlights include the magnificent Bidwell Parkway, designed as part of a comprehensive Buffalo parkway system, connecting several parks, by Frederick Law Olmsted. Bidwell Parkway and Chapin Parkway, as well as the circles at Soldiers Place and Gates Circle are part of the system, leading north to Delaware Park. Look for large mansions up and down Delaware Avenue.

Look for...

- A** Buffalo Seminary, on Bidwell Parkway, founded in 1851
- B** The Frank Lloyd Wright-designed Heath House on Soldiers Circle at Bird Avenue
- C** Fredrick Law Olmsted's Bidwell Parkway and Soldiers Circle
- D** Gates Circle
- E** The Garden Walk Buffalo and Elmwood Vilage Association's 25th Anniversary mural at 831 Elmwood Avenue

Note

Please enjoy the front yard garden strolls and beautiful landscapes from the sidewalk. In an effort to practice social distancing, we would like to note that side gardens and backyards will not be open to the public this year. Thank you very much for your cooperation.

- Practice social distancing
- Wear face masks as required
- Wear sunscreen
- Stay hydrated
- Wear comfortable shoes
- Wear a hat

Thank you to everyone for participating in this year's Gardens In Plain View! Visit [bcbswny.com/play](https://www.bcbswny.com/play) for more fun summer activities.

Look for this native plant in front yard gardens, color, and post it to Instagram with hashtag #plantsinplainview, and you could win a weekly prize in July!

Coneflower (*Echinacea*)

Echinacea is group of herbaceous flowering plants in the daisy family that bloom for the entire summer. Native to North America, the petals may be pink or purple, depending on the species, and they surround a seed head, or cone, that is spiky and dark brown or red.

What makes a wildlife habitat garden? Look for:

FOOD: Native plants provide food eaten by a variety of wildlife. Feeders can supplement natural food sources.

WATER: All animals need water to survive, and some need it for bathing or breeding as well.

COVER: Wildlife need places to take shelter from bad weather and places to hide from predators or hunt for prey.

PLACES TO RAISE YOUNG: Wildlife need resources to reproduce, and to protect and nourish their young.

SUSTAINABLE PRACTICES: Maintain your yard or garden in natural ways to ensure soil, air, and water stay healthy and clean.
